

Animal Embassy Vernal Pool Talk

Saturday, April 30, 2011 4:00-5:00 pm

Photo from [The Daily Weston](#)

Join Naturalist Chris Evers of Animal Embassy and enjoy his amazing photographs of life in and around the vernal pools in a digital slide presentation. You will be introduced to some of the enigmatic creatures that live in and around these ephemeral wetlands. Meet a variety of creatures likely to include Spotted salamanders, a Spotted turtle, Gray tree frogs and more!

And coming in May, there will be a Devil's Den Vernal Pool Field Trip walk with Chris where you will discover some of the unique creatures that visit these pools once a year to lay their eggs such as Wood frogs, American toads, and Spotted salamanders.

Saturday's program will take place in the Community Room at the Library and is free and open to the public, but registration is requested at friendsofthewestonlibrary@gmail.com or by signing up at the library. We hope you will join us!
