We need new doors added to the interior staircases to the upper floor apartment as well as changing the code to the farmhouse, to add security for the tenants.

Things to purchase for the farm concerning safety: megaphone, large light, defibrillator

Terry will speak with Janet Hoffman about Bee Cause project.

We did not vote to approve the goat house plans, as we want to see if it we can build a larger version and still need to site the project properly near the farmhouse. We hope to begin building this fall but will not acquire animals until the spring.... babies! It was a recommendation from our local veterinarian that we have female goats and get them as babies.
