

Minecrafters! Come join us on Sunday, October 20th from noon to 2 pm to sign up for the Weston Library Minecrafters' Team on the new Fairfield County Minecraft Server. This is a multi-town project that is designed to bring Minecrafters in the region together in a safe and creative environment. Libraries currently participating are Brookfield, Danbury, Darien, Fairfield, New Canaan, New Fairfield, Newtown, Norwalk, Stamford, Weston, Westport and Wilton.

The new server features a common spawn-point where all players gather and socialize—the Central Library. From there, you can teleport to Weston's very own world where you are free to mine, build and craft to your heart's content. Curious about what kids from other towns are up to? You're free to visit their worlds, but you can only build in your own world. Worried about griefing? We've got it covered. The server will be running many of the popular plugins you're used to including Grief Prevention and Core Protect. If you want to play, bring in your library card and tell us your player name and we will add you to the server!

Parents:

We've conceptualized this server from the beginning to be a safe environment for kids and teens. Before players can use the server they will need your permission. We ask that you sign their permission slip before they are added. They will be granted access to the server and given permission to build in their hometown world. We will know who each player is and how to get in touch with them should an issue arise. Safety and fun are our top priorities.

To get started:

Come in to the library, ask for a signup form. We will contact you as soon as you are added to the server.

To connect, start Minecraft, click on "multiplayer" and add a new server. You can call it *Fairfield County Minecraft* and use fcminecraft.org as the server address.

We look forward to building with you. Dig on!
