

Please join us at the
Weston Public Library
56 Norfield Road, Weston, CT
for a showing of the new movie,

"Genetic Roulette – The Gamble of Our
Lives"

A film by bestselling author,
Jeffrey Smith

On Tuesday, February 26, 2013
at 7:00 pm

Tara Cook-Littman
From
GMO Free CT

will be here to talk about the
importance of the GMO labeling issue
before and after the movie

Tara is a Nutrition Counselor
and former practicing attorney

If you're wondering what Proposition 37 in California and the labeling issue in Connecticut are all about, this movie will help you understand why 90% of the population wants foods labeled in order to tell if they contain genetically modified foods. Now is your opportunity to hear the whole story! We urge you to come and watch this film. The health of your family is at stake.

Experts expose the **SERIOUS THREATS** and how corporations like Monsanto hide the evidence.

NEVER-BEFORE-SEEN EVIDENCE points to genetically engineered foods as a major contributor to rising disease rates in the US population, especially among children. Gastrointestinal disorders, allergies, inflammatory diseases, and infertility are just some of the problems implicated in humans, pets, livestock, and lab animals that eat genetically modified soybeans and corn.

Monsanto's strong arm tactics, the FDA's fraudulent policies, and how the USDA ignores a growing health emergency are also laid bare. This sometimes shocking film may change your diet, protect you and your family, and accelerate the consumer tipping point against genetically modified organisms (GMOs) already underway. Don't miss this film!

We look forward to seeing you on Tuesday, February 26th.
