Re; 142 Steep Hill Rd, House location

Dear Commission,

In advance of our "Special Meeting" Thursday September 4th, I have attached an updated plan showing new trees and a fence the buyer would like to install.

Based on the letter from the Soil Scientist, also attached, I did not move the house from the previously discussed location.

Based on what the buyer heard at the last meeting, he felt it important to show you and let you know of his interest in planting trees and installing a fence along the cut line and within your review area, thereby replacing some trees to be removed and creating a buffer to the wetlands.

We hope this only helps any concerns you may have on future impact to the wetlands. The new drawings dated September 1, 2020 indicate the approximate location of that fence and trees proposed.

I look forward to our meeting Thursday night and hope we have addressed any concerns you may have regarding the impact of this house to be built and any future impact to the wetlands.

Thank you

Jon Rogers
