September 23, 2020

Good Afternoon to Whom This May Concern,

A&A Industrial will be replacing and/or fixing any of the silt fencing along the property. We will start this process once the property owner has gotten the go-ahead a from the town of Westport & Weston and after the trees have been removed. The reason for waiting to do the fencing till after the trees are removed is while the trees are getting removed the silt fencing could get damaged in that process. Once those two processes are complete, we will start with the silt fencing. After we fix and/or replace the silt fencing we will start prepping out the rain garden for filling to the desired height for the planting process. If you have any questions, please let us know. Thank you very much.

Sincerely,

Amanda Darch
