Hello Tom,

In regards to the site walk notes question, the earth volumes and material are indicated on the wetland application. Some common fill will be excess from #16 Katydid Lane, topsoil from the existing site and other materials will be from a quarry type facility for septic fill, gravel, bituminous concrete.

Contractor will have to provide the clean fill certification as well.

Steve Sullivan, PE

To all - Please see attached notes with questions that came up as a result of the observations. Note a planting plan has already been submitted for 20 Katydid and it will be posted and circulated to the members. Any other updates need to be at the Land Office in the Town Hall Annex on April 16 and no later than noon April 21 for the commissioners to have time to review them before the zoom meeting April 23 at 7:30p. An agenda and link will go out on April 21.
Cheers Tom
